

Vivify Ideas QA Test

Directions:

You have 24 hours to complete this task.

See the web application on the link below:

<https://gallery-app.vivifyideas.com/>

PLEASE ANSWER THESE QUESTIONS (and send them in a google doc or PDF format)

- How would you approach testing of this app?
- What are the critical functionalities of this app, in your opinion?
- How would you approach automation for this app?
- If you find any issues please report them in the bug report format you find most appropriate

Automation task

- Please do front and backend automation of some features that you find the most critical on the gallery app (exclude login and register)?
- You can use Selenium or any other testing tool or framework that you find applicable to this project.
- If you can do it in JS that would be a plus but all other languages are acceptable.
- When you finish, you can send us your git repo. Don't forget to add a readme file with all dependencies, so we can run your code and tests.

You're done! 🕶️
